

Network Operations Center (NOC)

NOC services are responsible for responding to and supporting the critical devices that allow your business to function. ScotiaComp Technologies works proactively to ensure the reliability of servers and network appliances that your infrastructure requires.

NETWORK MONITORING

Your network and servers will be monitored and protected from external and internal threats

PATCH MANAGEMENT

Your systems will be updated when patches are available to keep your systems secure and functional

REMOTE SUPPORT

Your managed network and devices will be supported remotely

REMOTE MONITORING & MANAGEMENT

Managed devices will be monitored for trouble and maintained to ensure the availability and reliability of critical infrastructure

Need-to-Know Access

Only members of our team that need to know will have access to your network and their activity is monitored with regular audits completed

NETWORK CONNECTIVITY

Your users will be supported for access problems to critical systems
